

Adobe has released a beta lens profile for the DJI Phantom 2 Vision camera to remove lens distortion. The official profile will be released in December. Follow the instructions below to download the beta lens profile and give it a try. If you have any problems or suggestions, please let us know: social@dji.com.

Instructions:

1. Download the lens profile from <http://www.dji.com/download/phantom-2-vision-downloads/>, and unzip it.
2. Put the file **PHANTOM VISION FC200.lcp** into the folder shown below:

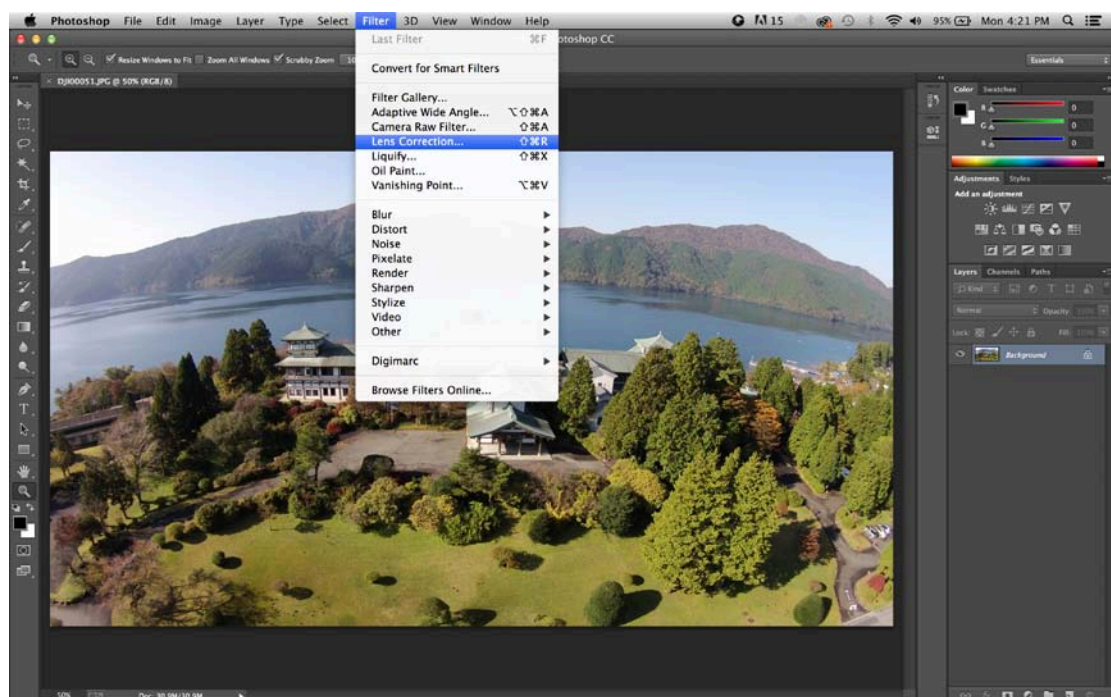

Mac

/Users/[username]/Library/Application Support/Adobe/CameraRaw/LensProfiles/1.0/

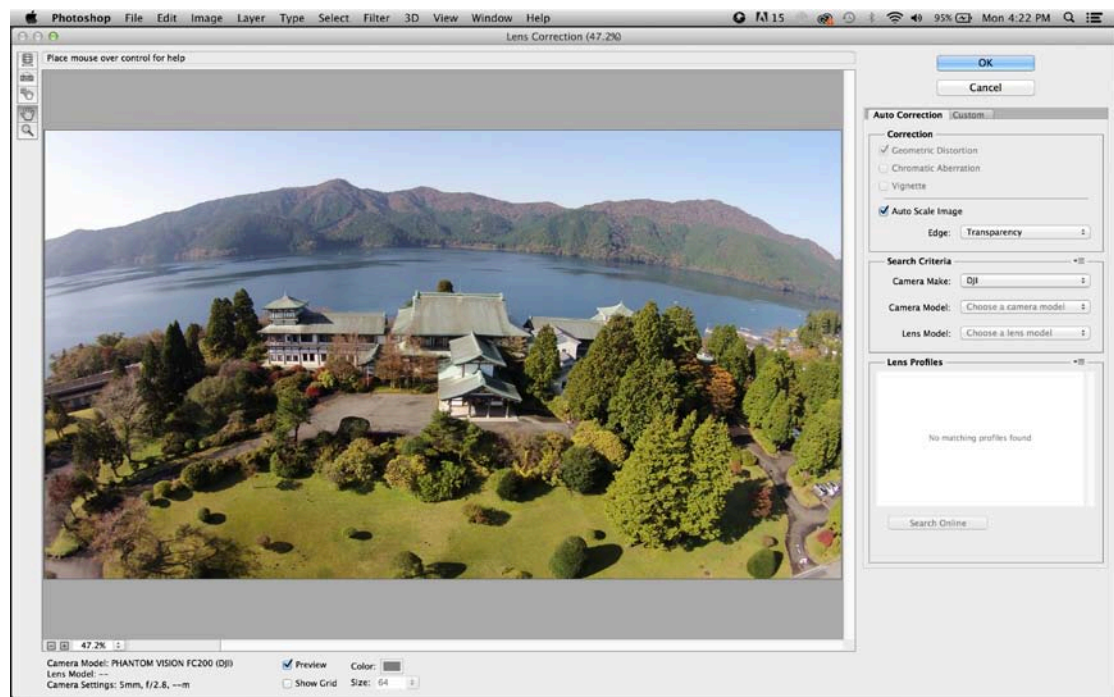

Windows

C:\ProgramData\Adobe\CameraRaw\LensProfiles\1.0

3. Open **PHOTOSHOP**, select **Filter**.

4. Select **Lens Correction** → **Camera Make** → Select **DJI**.

5. Select Camera Model → PHANTOM VISION FC200.
