Anti-interference Reinforcement Board of H3-3D

H3-3D

8PIN Port of H3-3D
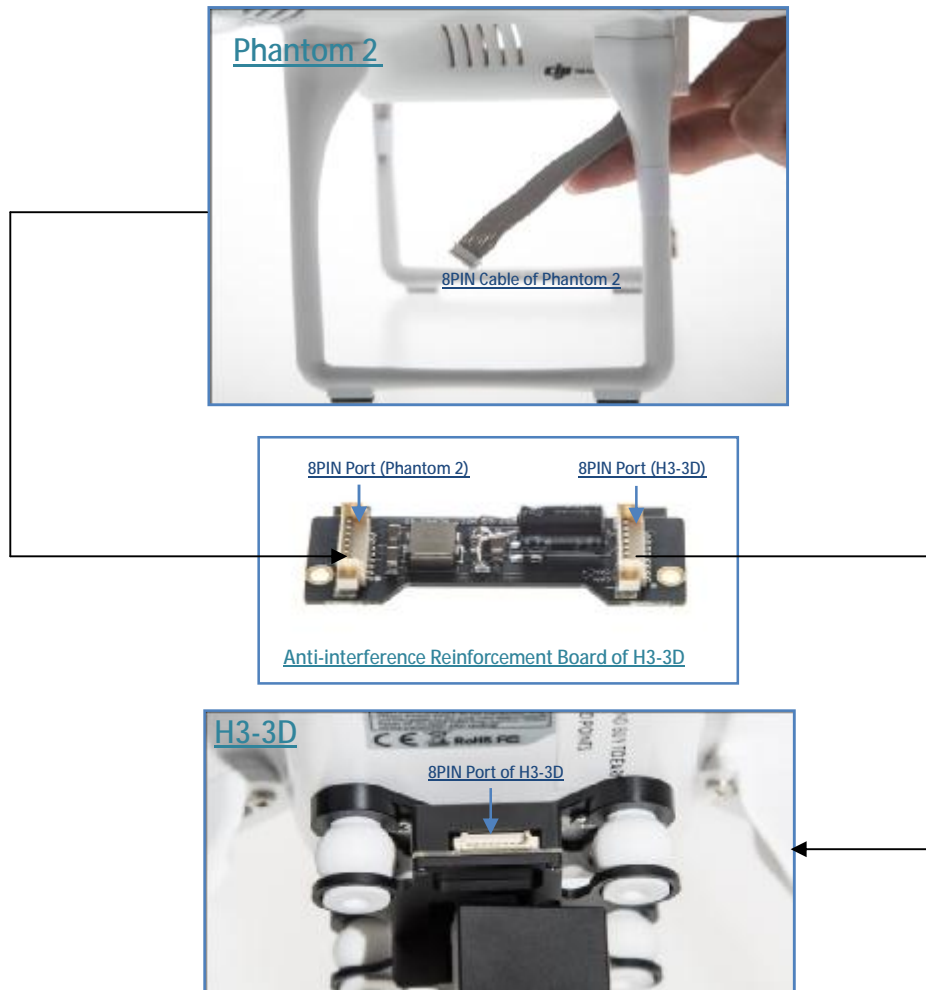

The Anti-interference Reinforcement Board is an accessory of the DJI H3-3D (For Phantom 2 Only version), you may follow the connection chart above to connect the Phantom 2 and H3-3D with the board. Please pay attention to the Input and Output ports of the board. There are two ways to mount the board, you can use a 3M double-side tape to fix it at the bottom of the Phantom 2, OR you can mount the board directly inside the Phantom 2 as shown in the picture below.
